

I CLAIM:

1. A composition comprising:
one or more antimicrobial agents that alone or in combination have antibacterial
and antifungal properties;
5 a vasoconstriction agent;
a steroidal anti-inflammatory;
a stimulant; and
a carrier.
- 10 2. The composition of claim 1 wherein said antimicrobial agents comprise one or
more of the agents selected from the group of Polymyxin B Sulfate, Bacitracin Zinc,
and 8—Hydroxyquinoline Sulfate.
- 15 3. The composition of claim 2 wherein said antimicrobial agents comprise
substantially 25.3 percent by weight of the composition.
4. The composition of claim 1 wherein said vasoconstriction agent is
Phenylephrine HCL.
- 20 5. The composition of claim 4 wherein said vasoconstriction agent comprises
substantially 0.25 percent by weight of said composition.
6. The composition of claim 1 wherein said steroidal anti-inflammatory is
micronized Hydrocortisone.

7. The composition of claim 6 wherein steroidal anti-inflammatory comprises substantially 1 percent by weight of said composition.

8. The composition of claim 1 wherein said stimulant is Ichthammol.

5

9. The composition of claim 8 wherein said stimulant comprises substantially 6.25 percent by weight of said composition.

10. The composition of claim 1 further comprising a skin disinfectant agent.

10

11. The composition of claim 10 wherein said skin disinfectant agent is Povidone-Iodine.

12. The composition of claim 11 wherein said skin disinfectant agent comprises substantially 12.8 percent by weight of said composition.

15

13. The composition of claim 1 further comprising a demulcent agent.

14. The composition of claim 13 wherein said demulcent agent is tincture of Benzoin.

20

15. The composition of claim 14 wherein said demulcent agent comprises substantially 11.7 percent by weight of said composition.

16. The composition of claim 1 wherein said carrier is a base ointment.

17. The composition of claim 16 wherein said base ointment is a mixture including anhydrous lanolin and white petrolatum.

5

18. A composition comprising the formulation by weight:

Component	Percentage by Weight
Base Ointment	42.70
Polymyxin B Sulfate and Bacitracin Zinc in a ratio of 20 10 parts Polymyxin B Sulfate to 1 part Bacitracin Zinc	25.00
8—Hydroxyquinoline Sulfate 0.3%	0.30
Benzoin Tincture	11.70
Ichthammol	6.25
Hydrocortisone (micronized)	1.00
15 Phenylephrine HCL 0.25%	0.25
Povidone-Iodine 10% solution	12.80

19. The composition of claim 18 wherein said base ointment is a mixture including anhydrous lanolin and white petrolatum.

20

20. A process for manufacturing a composition comprising:

mixing a base ointment, said base ointment comprising substantially one part anhydrous lanolin to three parts white petrolatum;

combining substantially 12.8% by weight Povidone-Iodine 10% solution,
substantially 11.7% by weight tincture of Benzoin in liquid form, and substantially
6.25% by weight Ichthammol in liquid form with said base ointment and mixing; and

combining substantially 25% by weight Polymyxin B Sulfate and Bacitracin
5 Zinc in a ratio of 20 parts Polymyxin B Sulfate to 1 part Bacitracin Zinc, substantially
0.3% by weight 8—Hydroxyquinoline Sulfate 0.3%, substantially 1% by weight
Hydrocortisone (micronized), and substantially 0.25% by weight Phenylephrine HCL
0.25% and adding to said mixture of base ointment and Povidone-Iodine, tincture of
Benzoin, and Ichthammol.

10

21. A product made according to the process of claim 20.
